

UX Testing + UI Iteration

	User Interface: How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout? (ex: sizes, colors, fonts, alignment, etc.)	User Experience: What elements of the user experience could be improved to make the page more intuitive and more fun/satisfying? (ex: sounds, hover effects, press effects, etc.)
User 1 Name: Vivian Vargas	<ul style="list-style-type: none">• Balance the top 3 space gaps like the side albums.• Maybe try to fix the albums name in the description box in Italic size.• Have the lightstick itself without the boxes.• Make the video auto-play.	<ul style="list-style-type: none">• Have the video start at a certain point.• Change the hover effect once the album was already clicked so that way a person would already click the album.
User 2 Name: Arianna Rodriguez	<ul style="list-style-type: none">• Get rid of the top 3 albums space.• Change the drop-shadow color for lightstick 1 and 2 to yellow and a different color for album 5.• Bold or Italic fonts for the album name in the description.	<ul style="list-style-type: none">• From hover to active, make the light dimmer.• Add a simple sound effect to the albums and lightstick cover.• Change the cursor to a flower or the lightstick.• Add a hover and active to the box of description.
User 3 Name: salvador rojas	<ul style="list-style-type: none">• Add Italic or bold or change fonts for each albums.• Change the colors or fonts for the click to reset button.• Change the video to auto-play and start at certain point.	<ul style="list-style-type: none">• Change the hover effect for the right lightstick change to yellow.• Change the cursor to flower when hover over the box and buttons.• Different sounds effect for each buttons and separate the lightsticks sounds also.• Add a hover and active to the box of description.
User 4 Name: Sophie Owen	<ul style="list-style-type: none">• Match different fonts with different albums.• When click reset, make the outer two albums align with the side albums.• Change the "click to reset" to different color to make it more stands out.• Get rid of the boxes for the lightsick button.	<ul style="list-style-type: none">• Add click sounds to the album cover.• Change the dropshadow for the lightstick to yellow.• Add related sounds to the lightsticks.• Add hover effect to reset buttons.• Change the cursor to flower when hover over the box and buttons.

		<ul style="list-style-type: none">● Change the transparency of the buttons when clicked.
User 5 Name: Mario Restori	<ul style="list-style-type: none">● Change the fonts for each albums.● Keep the box for the lightstick.● Have a button to bring back the intro video.	<ul style="list-style-type: none">● Make the dropshadow darker for the lightstick● Different sounds effect for each buttons and separate the lightsticks sounds also.● Change the cursor to flower when hover over the box and buttons.● Add hover effect for the box.

UI Before Feedback (Screenshot / GIF)	What <u>trends</u> did you identify in your feedback?
 <p>The BIGBANG lightstick, known as the Bang Bong, is one of K-pops most iconic lightsticks and was originally invented and designed by G-Dragon. It features a bold yellow crown-shaped top symbolizing BIGBANG's title as the Kings of K-Pop, placed on a sleek black or white handle with the groups logo. Representing power, royalty, and VIP fandom pride, it lights up in BIGBANG's signature yellow, creating a sea of glowing crowns at concerts. Bold, stylish, and instantly recognizable, it reflects BIGBANG's legacy and strong connection with their fans. (Click to reset)</p>	<ul style="list-style-type: none">● Change the fonts for each albums, make the fonts of the title of the song bold or Italic.● Change the cursor to flower when hover over the albums cover.● Add a hover effect to the box when so that when people hover over to reset, it makes the box more appealing.● When an album is clicked, make it appear more push back so that way the user know which album button they just clicked on.● Change the "click to reset" to different color to make it more stands out more.
UI After Feedback (Screenshot / GIF)	What <u>changes</u> did you make to improve your UI?

- Add hover image to each album and the reset box.
- Add hover effect to the reset box
- Make the video auto-play
- Make the button look clicked.
