

SUPERFAN

**INTERACTIVE
EXPERIENCE**

BRAINSTORM

come up with three different ideas of themes + interactive features

Idea 1: Chainsaw Man-Reze arc

Theme: An interactive webpage that showcase each character their devil form and how it functions!

Interactive JS Feature #1

When you click a character, the character changes from their **regular human form** to their **devil form**. I want it to look like they're transforming so people can see what their devil form looks like.

Interactive JS Feature #2

When you click a character's name, a little box pops up with information about their **devil power** and how it works. That way, users can learn about each devil form without the screen being crowded.

Idea 2: Attack on titan

Theme: An interactive webpage that showcase characters different titan form!

Interactive JS Feature #1

When you click a button, the character changes from their **normal human form** to their **Titan form**. For example, when you click "Transform," Eren changes into the Attack Titan.

Interactive JS Feature #2

When you click a character's name, a box appears that explains what kind of Titan they are and what their ability is. Clicking again hides it.

Idea 3: G-Dragon

Theme

An interactive webpage about **G-Dragon**, showing his fashion, music eras, and creative style through visuals and interactions.

Interactive JS Feature #1

A description box to click and reset everything.

Interactive JS Feature #2

When you click on an album, a small box pops up showing what year it came out and what it's about (for example, clicking "Crooked" shows a short description and a music video with it).

EVALUATE

think about the good and bad for each idea then choose one

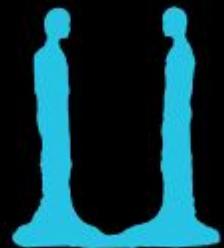

Evaluate + Choose Your Idea

	Pros	Cons
Idea 1:	<ul style="list-style-type: none">-Really creative and fun because each character has a different devil form to show.-Lets me use beginner-level JavaScript like buttons and image changes.-Fits the theme of transformations, which makes the page more interactive.-Has strong visuals that will catch people's attention.	<ul style="list-style-type: none">Finding or editing good images for each character could take a while.Might be tricky to make the transformations look smooth.Could get cluttered if I add too many characters at once.
Idea 2:	<ul style="list-style-type: none">-Popular theme that people will recognize and enjoy.-The titan transformations fit perfectly with interactive features like image swaps.-Easy to connect to the story by showing each character's titan power.	<ul style="list-style-type: none">Some titan images might be hard to find or too detailed for the layout.Could take time to match the right visuals with each character's description.Needs careful design so it doesn't look too crowded or repetitive.
Idea 3:	<ul style="list-style-type: none">-Unique idea that stands out from anime-themed projects.-Lets me mix music, fashion, and visuals for a creative webpage.-Gives space to add personal style and creativity.	<ul style="list-style-type: none">-Will take time to find clear photos from different years.-Adding sound or music clips could be more advanced if I choose to include them.

"Crooked" by G-Dragon is a high-energy rock-influenced track that reveals the pain behind his rebellious image. Beneath its upbeat tempo and punk-style rhythm, the song expresses feelings of loneliness, frustration, and emotional isolation. G-Dragon uses "crooked" as a metaphor for wanting to act tough and carefree while secretly yearning for understanding and love. Its raw honesty, catchy hook, and intense emotion made "Crooked" one of the standout and most popular songs from his album *Coup d'Etat*, showcasing both his musical versatility and vulnerability.

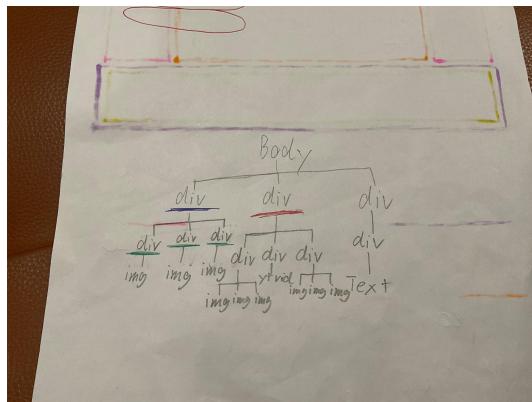

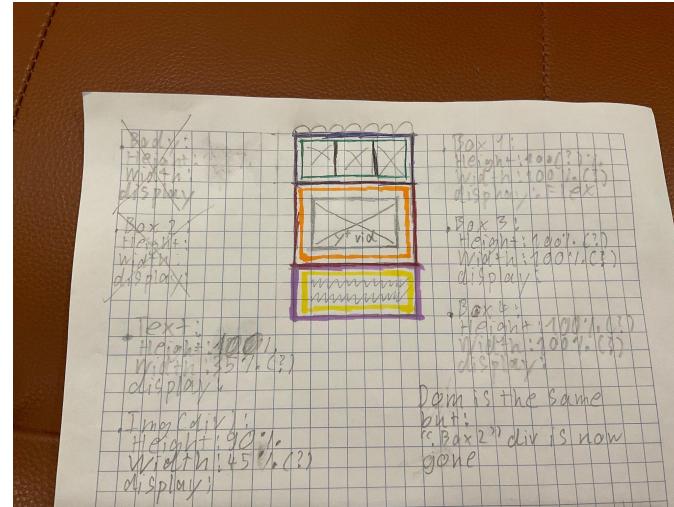

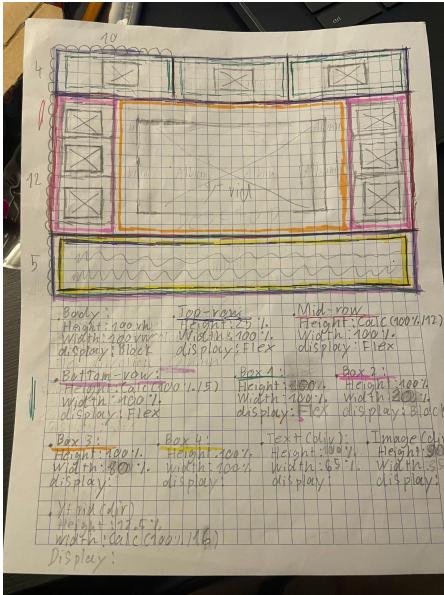

"Too Bad" by G-Dragon featuring Anderson .Paak is a smooth, groovy track that blends R&B, funk, and hip-hop influences. The song captures the bittersweet feeling of love that's fading — playful on the surface but tinged with regret underneath. G-Dragon's laid-back verses mix effortlessly with Anderson .Paak's soulful vocals, creating a balance between confidence and vulnerability. With its slick production and irresistible rhythm, "Too Bad" stands out as one of G-Dragon's most stylish and musically rich collaborations, highlighting both artists' charisma and chemistry.

ANNOTATE

add explanations, colors, percentages, and display properties + draw your dom

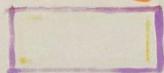

HTML

CSS

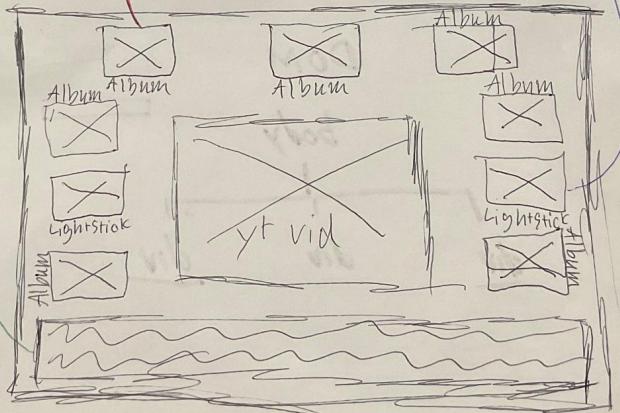

"When the album/lightstick
description appear below the
screen, click on that box to
reset."

"When click
on a album
a popular song
from that album
will appear in the middle."

"When click
on the light-
stick ~~pic~~ of
cool photo of that
particular lightstick
will appear in the
middle."

BUILD

create your desktop divs using html and css then make it responsive

A 4x4 grid of colored squares. The colors are arranged in a repeating pattern: top row (left to right) is green, yellow, brown, brown; middle row (left to right) is pink, dark red, pink, pink; bottom row (left to right) is brown, brown, brown, brown. The central square is dark red.
